

15 Cybersecurity quotes from famous people in the field

Posters / Cards

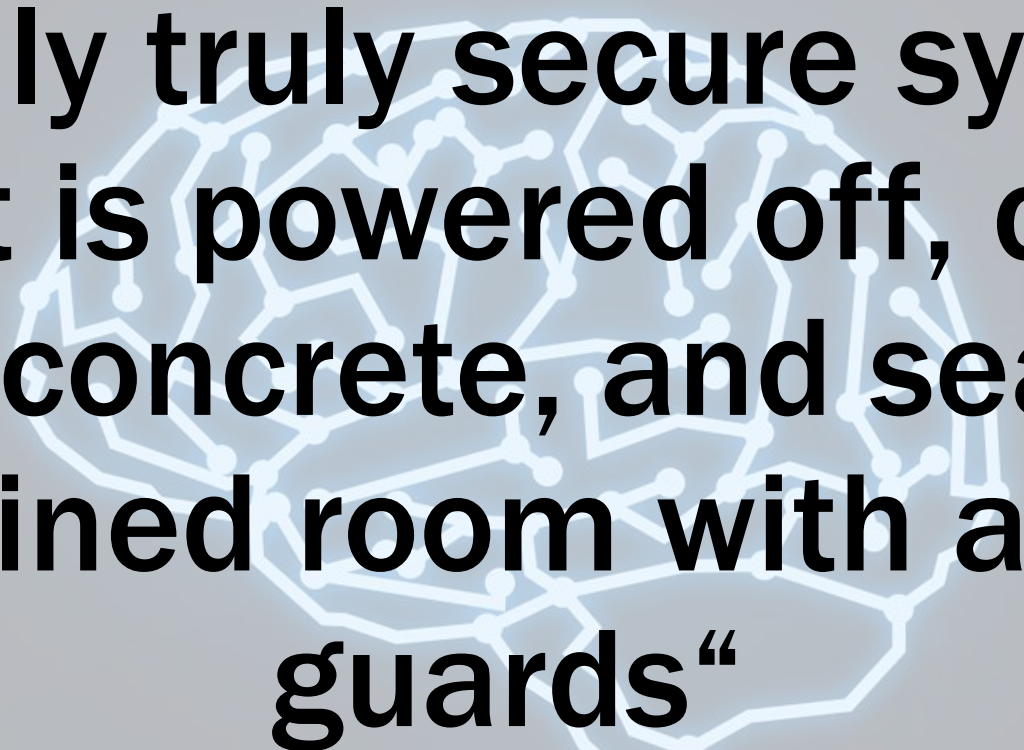

Perfect for:

Displaying on empty walls that need a bit of decor

Classroom bulletin boards

Offices / Staff lounges / Free time areas

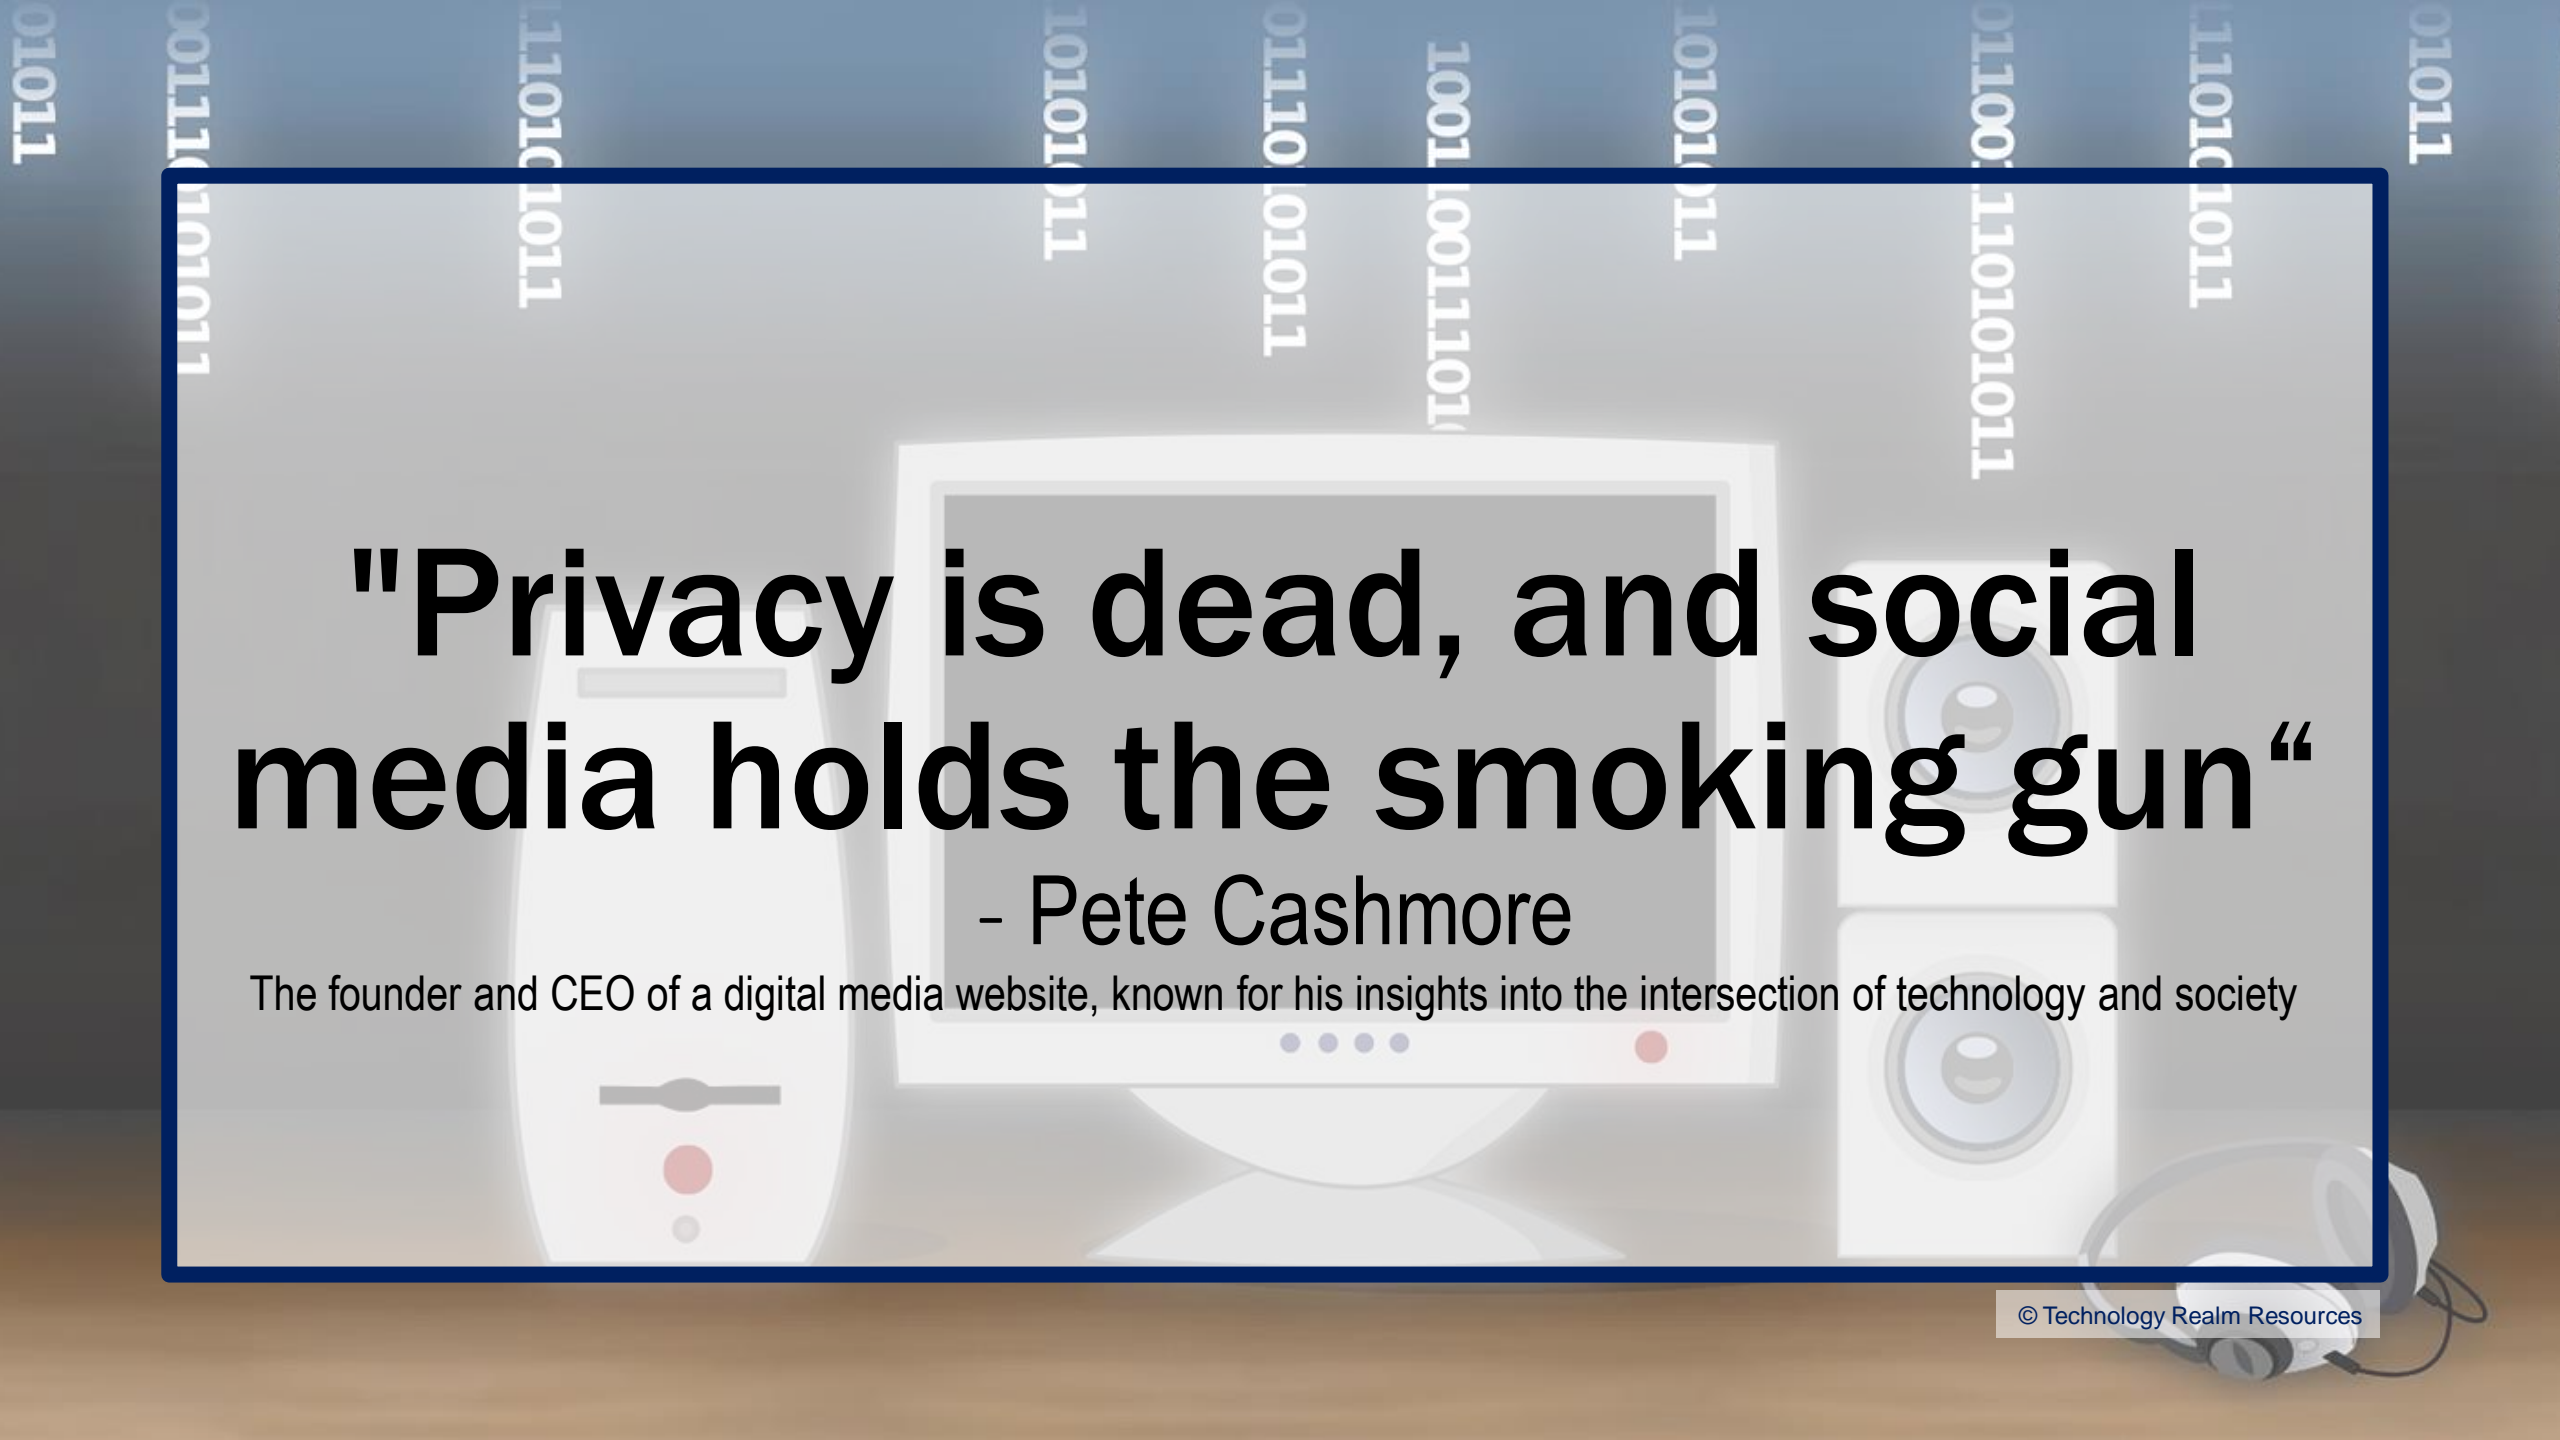

Printed as cards and gifted to students or friends

"The only truly secure system is one that is powered off, cast in a block of concrete, and sealed in a lead-lined room with armed guards"

- Gene Spafford

A renowned computer scientist and cybersecurity expert known for his work in software engineering and computer security

"Privacy is dead, and social media holds the smoking gun"
- Pete Cashmore

The founder and CEO of a digital media website, known for his insights into the intersection of technology and society

An illustration featuring two figures. On the left, a hacker wearing a black balaclava and a grey suit is shown in profile, holding a large grey steering wheel. On the right, a security professional in a purple long-sleeved shirt and grey trousers is shown in profile, holding a green folder. In the center, a large, light blue computer monitor is depicted with a grey padlock and a chain wrapped around its frame. The background is white with a dark blue border.

"In cybersecurity, the more systems we secure, the more we encourage hackers to outsmart us"

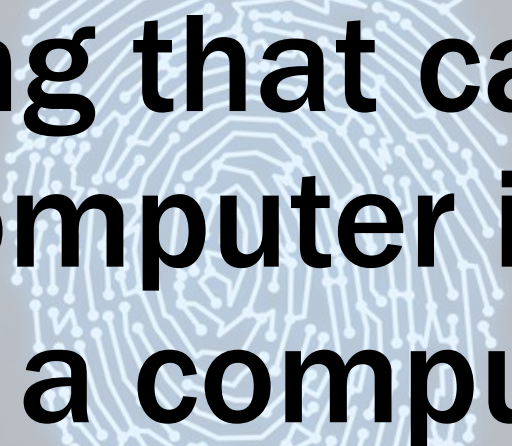

- Dan Kaminsky

A cybersecurity researcher and chief scientist, known for his work in computer security, cryptography, and DNS (Domain Name System)

"Companies spend millions of dollars on firewalls, encryption, and secure access devices, and its money wasted; none of these measures address the weakest link in the security chain"

- Kevin Mitnick

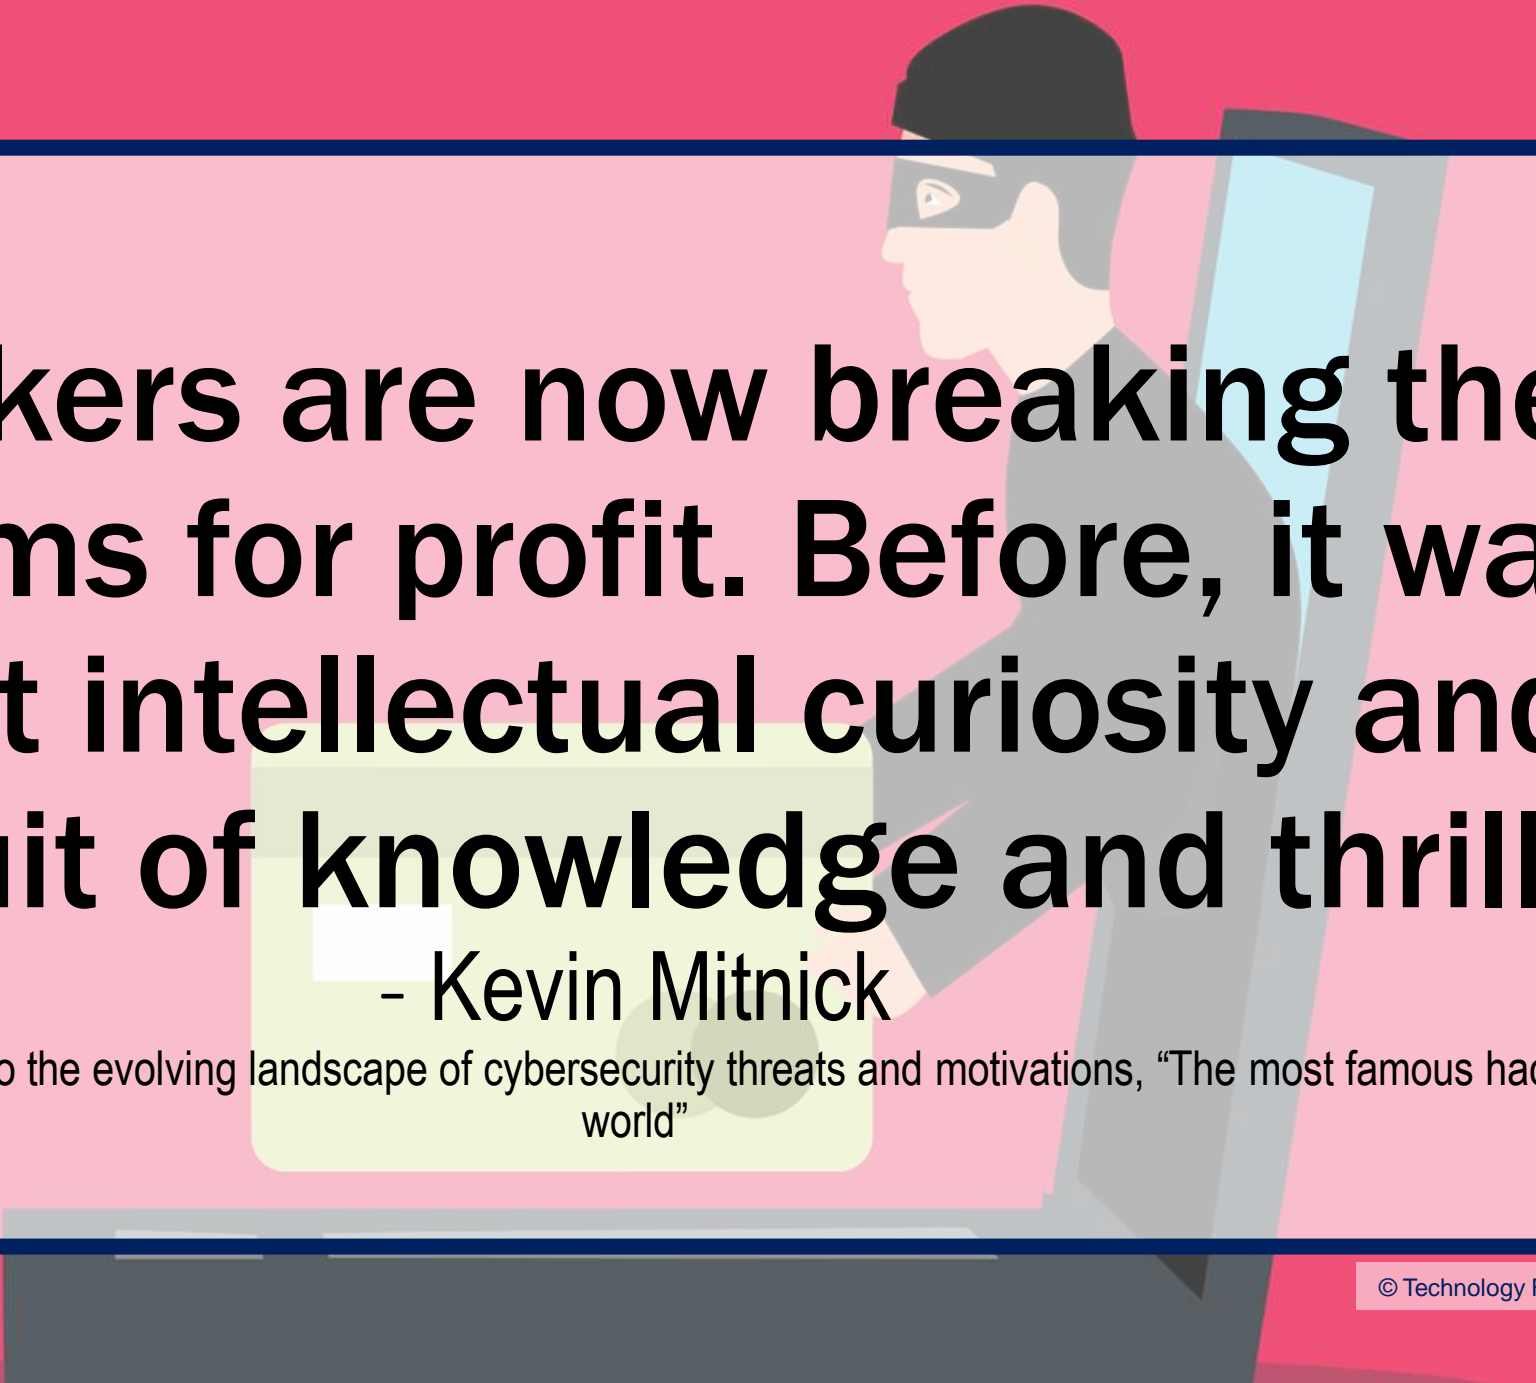

"The most famous hacker in the world"

**"The only thing that can stop a bad
guy with a computer is a good guy
with a computer"**

- Mark Burnett

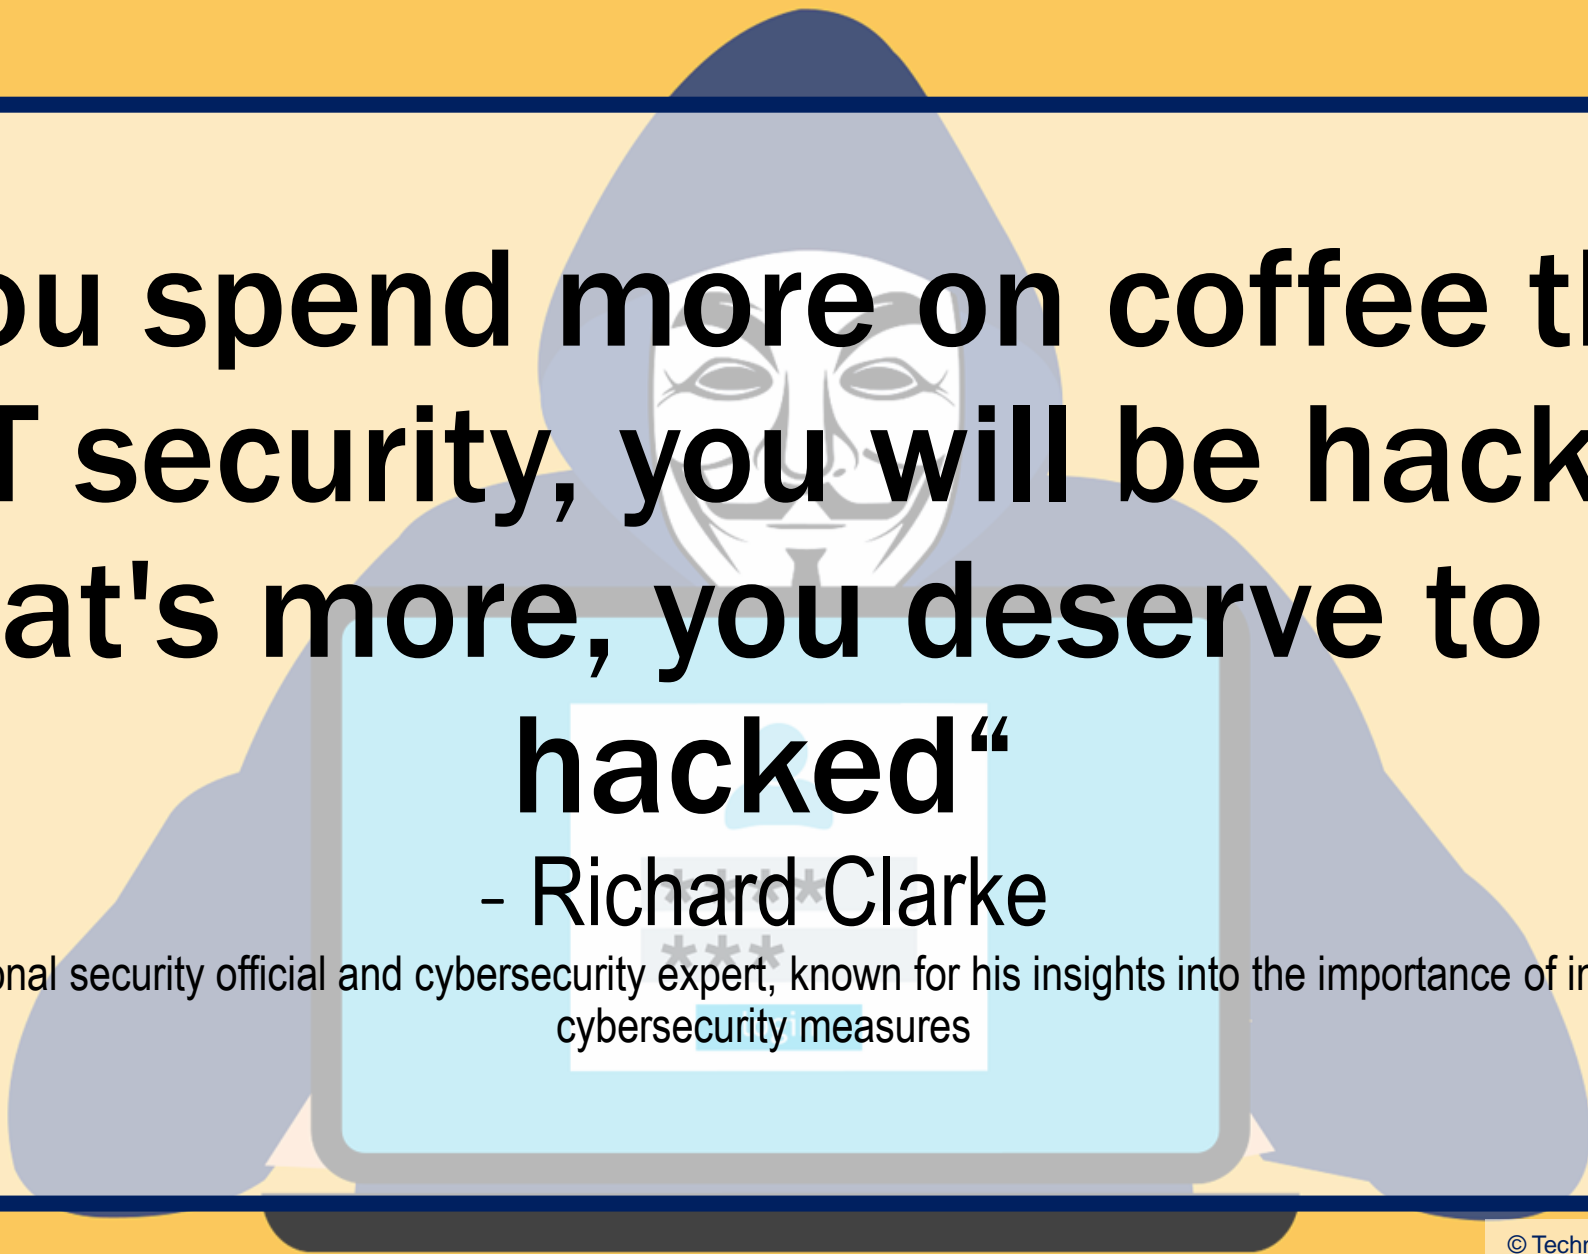

A cybersecurity expert and author known for his work in password security and network protection

"Hackers are now breaking the systems for profit. Before, it was about intellectual curiosity and pursuit of knowledge and thrill"

- Kevin Mitnick

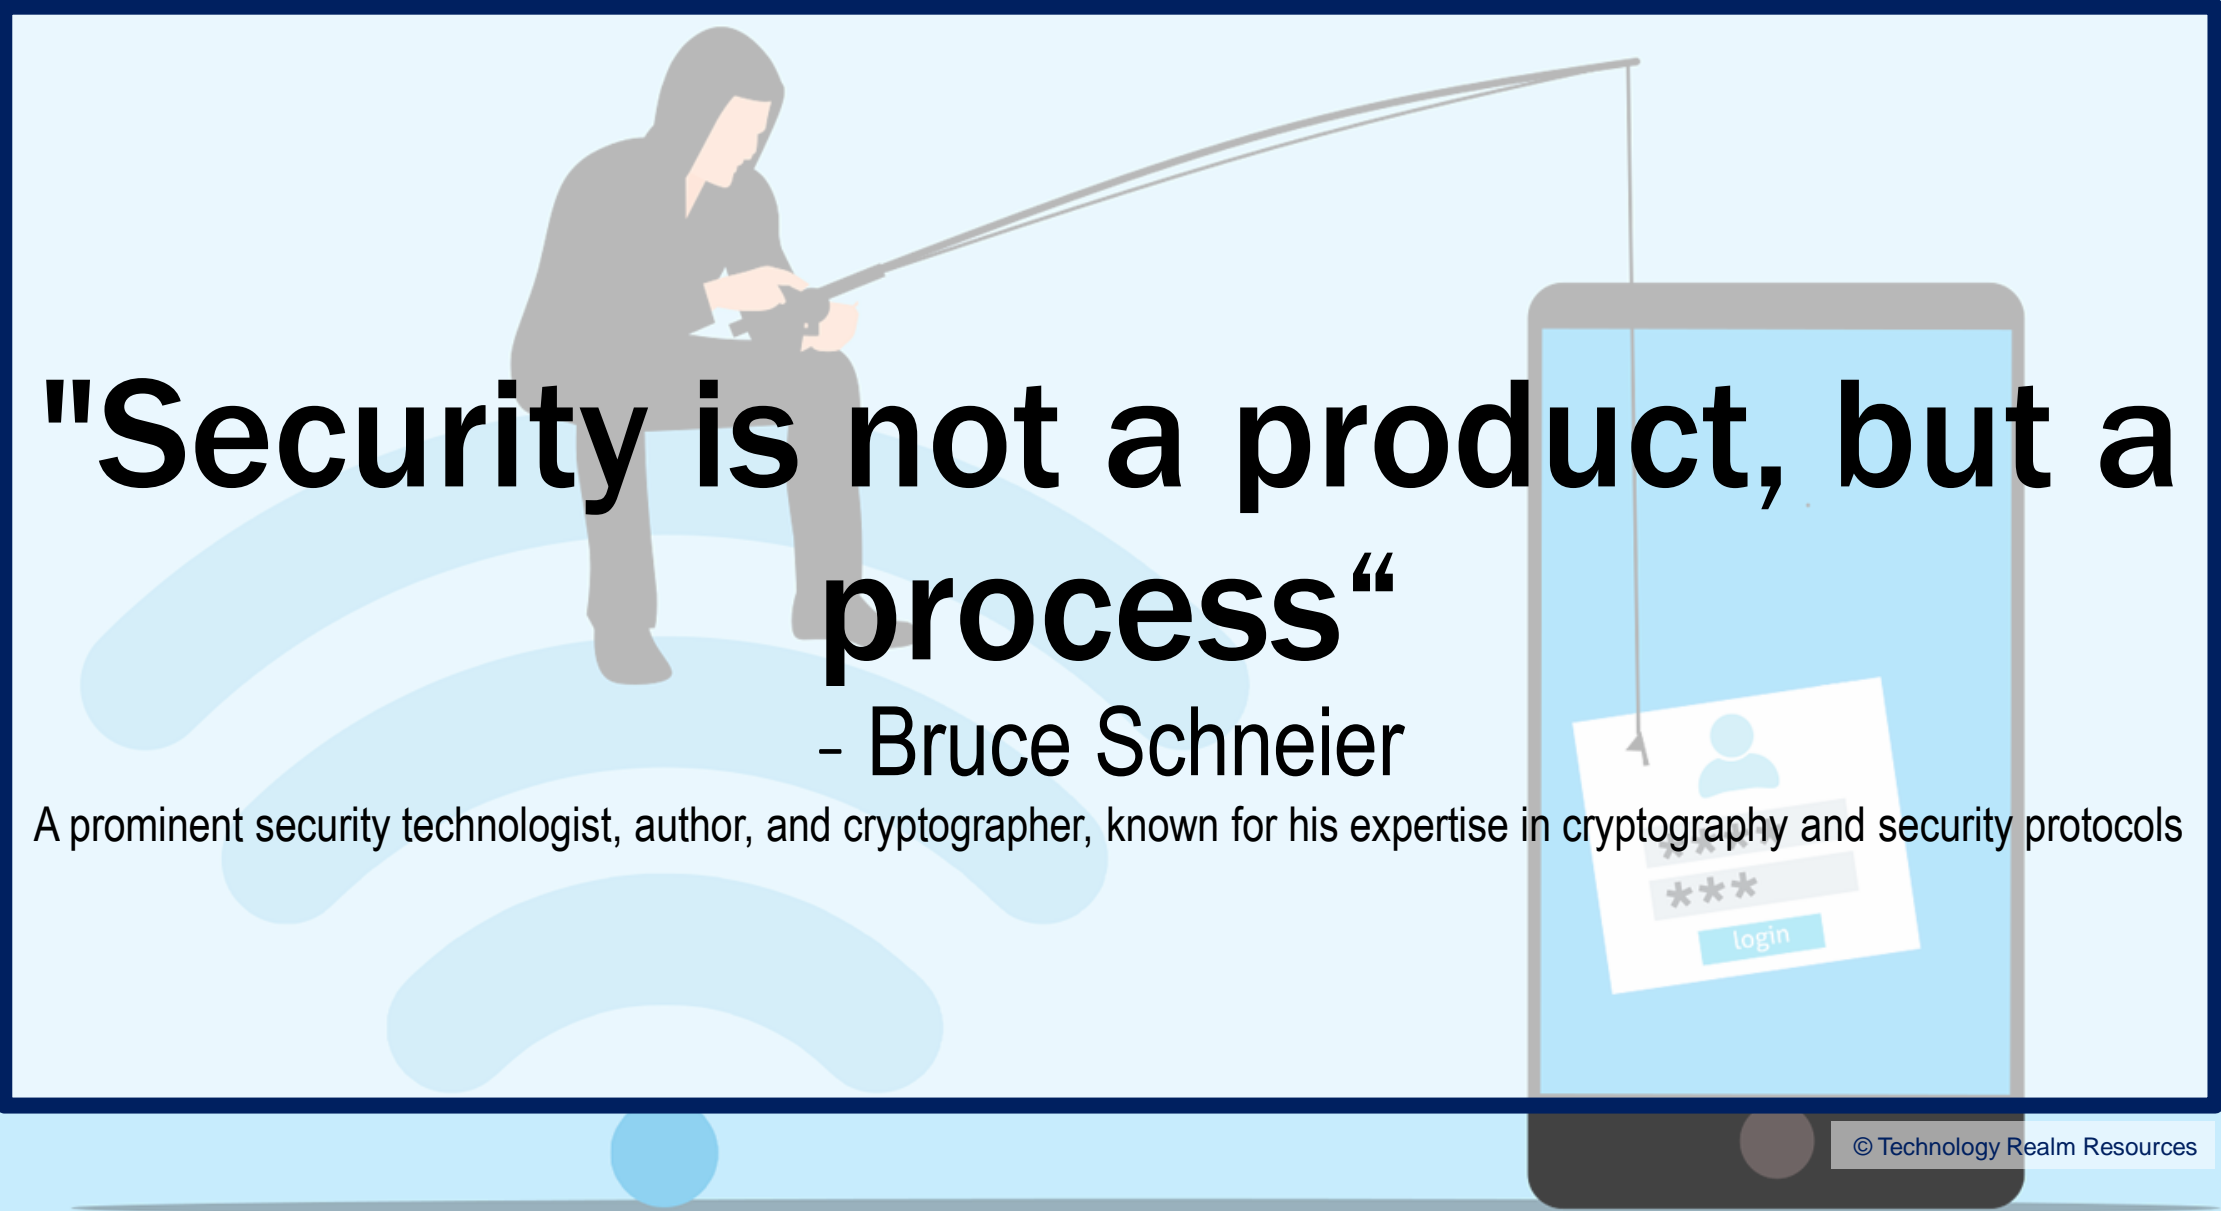

Known for his insights into the evolving landscape of cybersecurity threats and motivations, "The most famous hacker in the world"

"If you spend more on coffee than on IT security, you will be hacked. What's more, you deserve to be hacked"

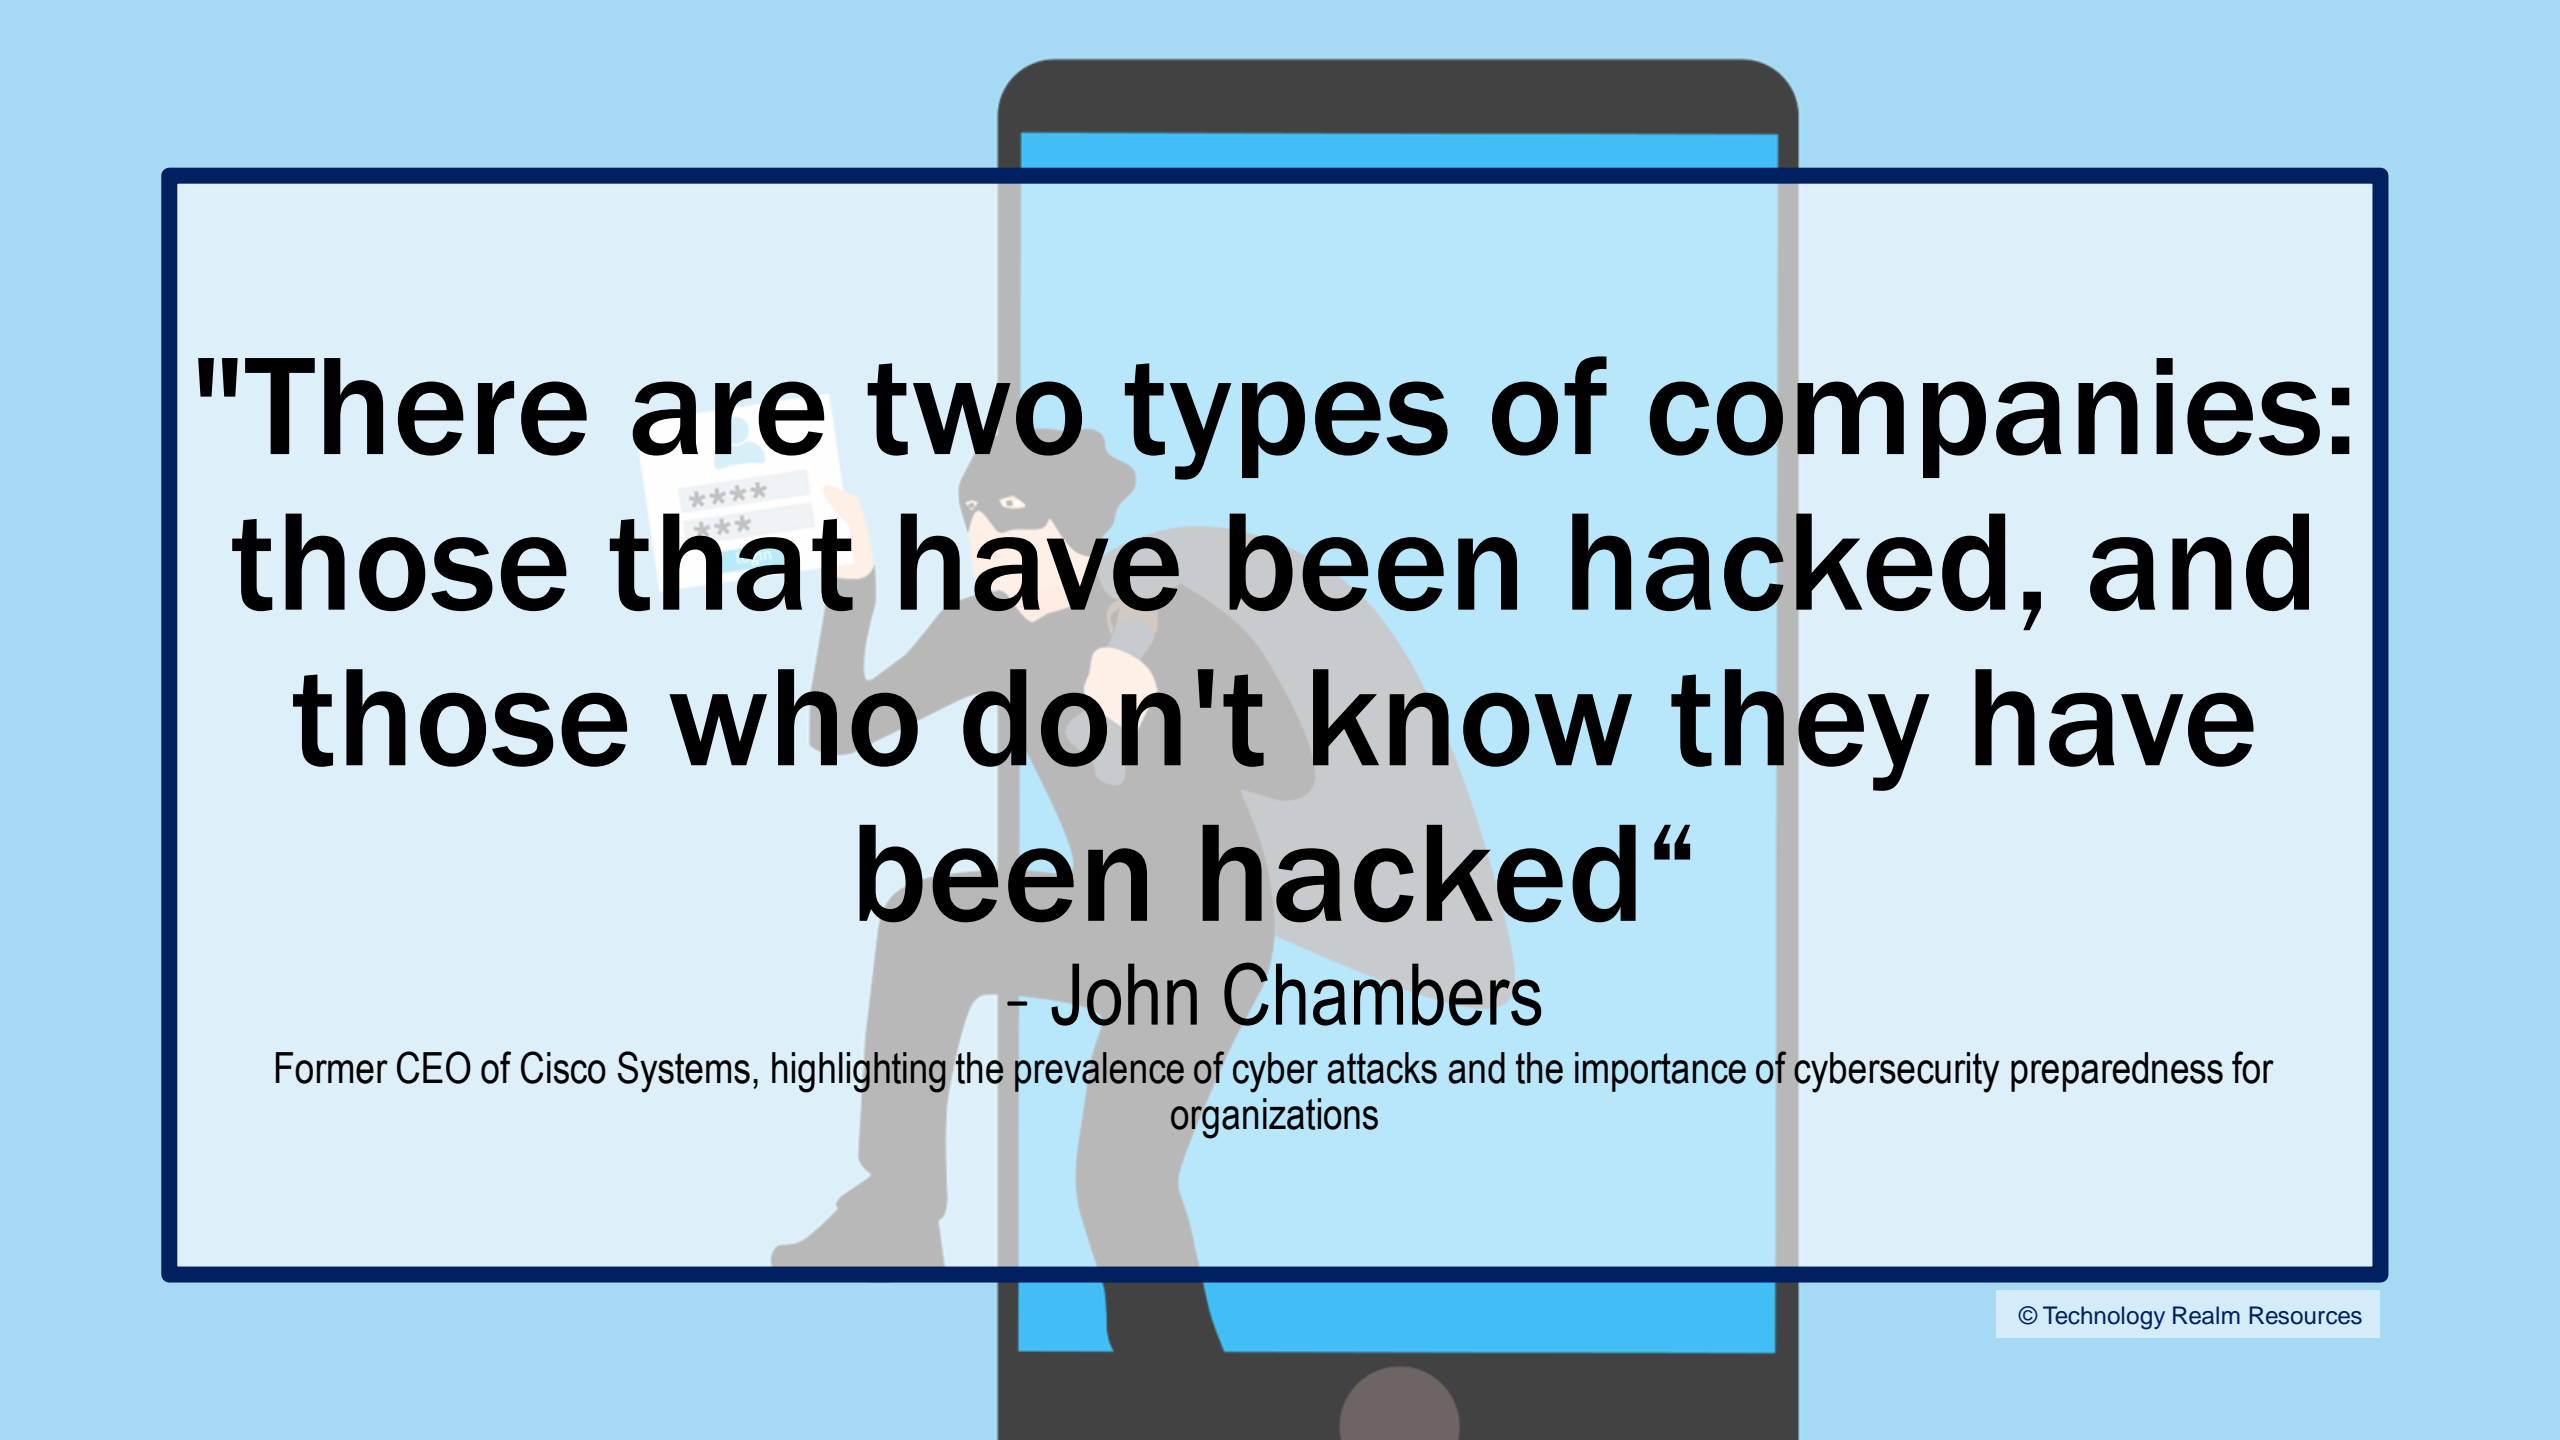

- Richard Clarke

A former national security official and cybersecurity expert, known for his insights into the importance of investing in cybersecurity measures

An illustration of a person in a dark hoodie sitting on a large blue Wi-Fi symbol, fishing with a long rod. The rod is angled towards a large smartphone on the right. The smartphone screen displays a login form with a user icon, a password field containing three asterisks, and a 'login' button. The background is light blue with a dark blue border.

"Security is not a product, but a process"
- Bruce Schneier

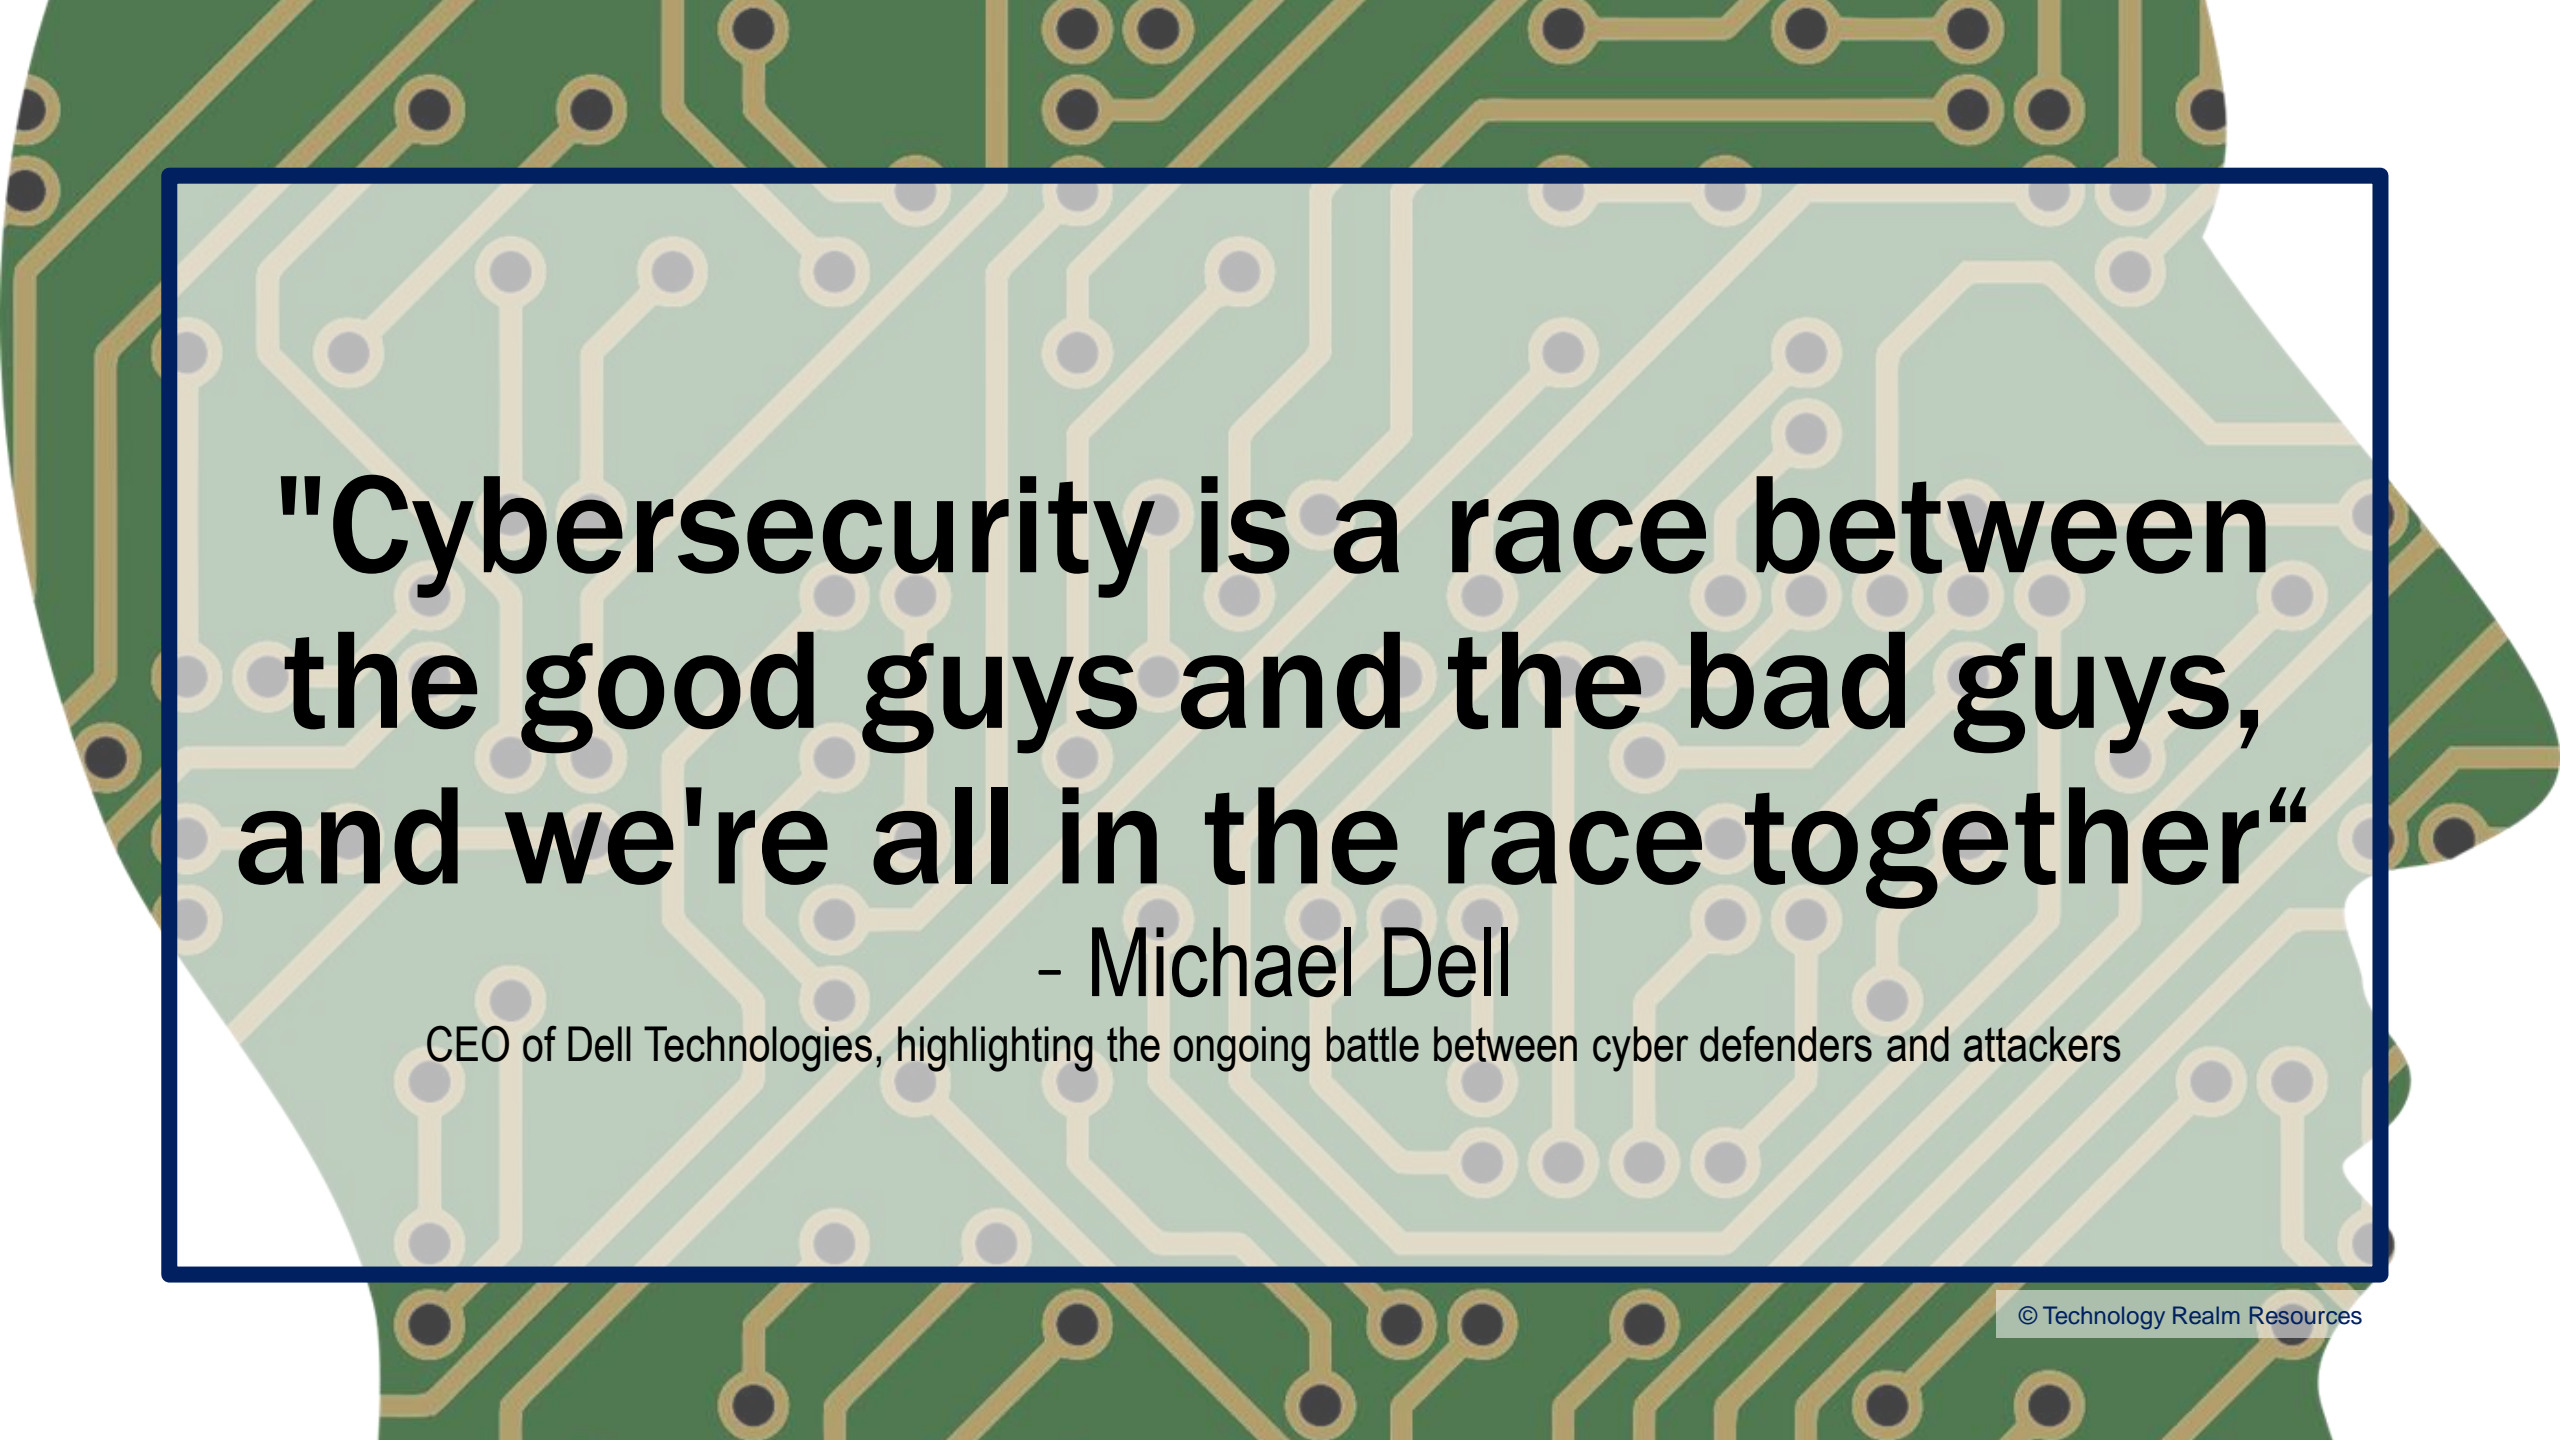

A prominent security technologist, author, and cryptographer, known for his expertise in cryptography and security protocols

A large, light blue smartphone graphic is centered in the background. Overlaid on the screen is a dark silhouette of a hacker wearing a mask and holding a device. The device screen shows a login form with two rows of asterisks. The main text of the quote is overlaid on the smartphone screen.

**"There are two types of companies:
those that have been hacked, and
those who don't know they have
been hacked"**

- John Chambers

Former CEO of Cisco Systems, highlighting the prevalence of cyber attacks and the importance of cybersecurity preparedness for organizations

**"Cybersecurity is a race between
the good guys and the bad guys,
and we're all in the race together"**

- Michael Dell

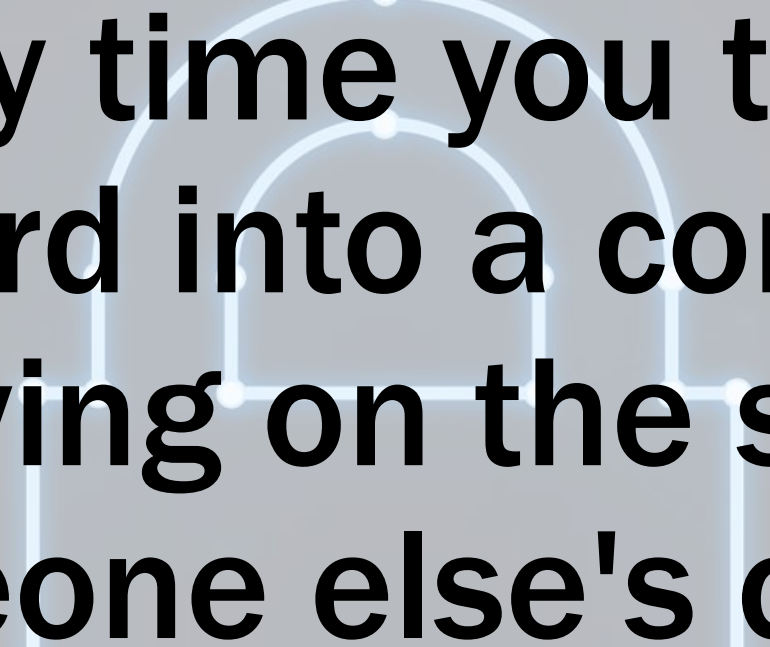

CEO of Dell Technologies, highlighting the ongoing battle between cyber defenders and attackers

"The weakest link in the security chain is the human element"

- Kevin Mitnick

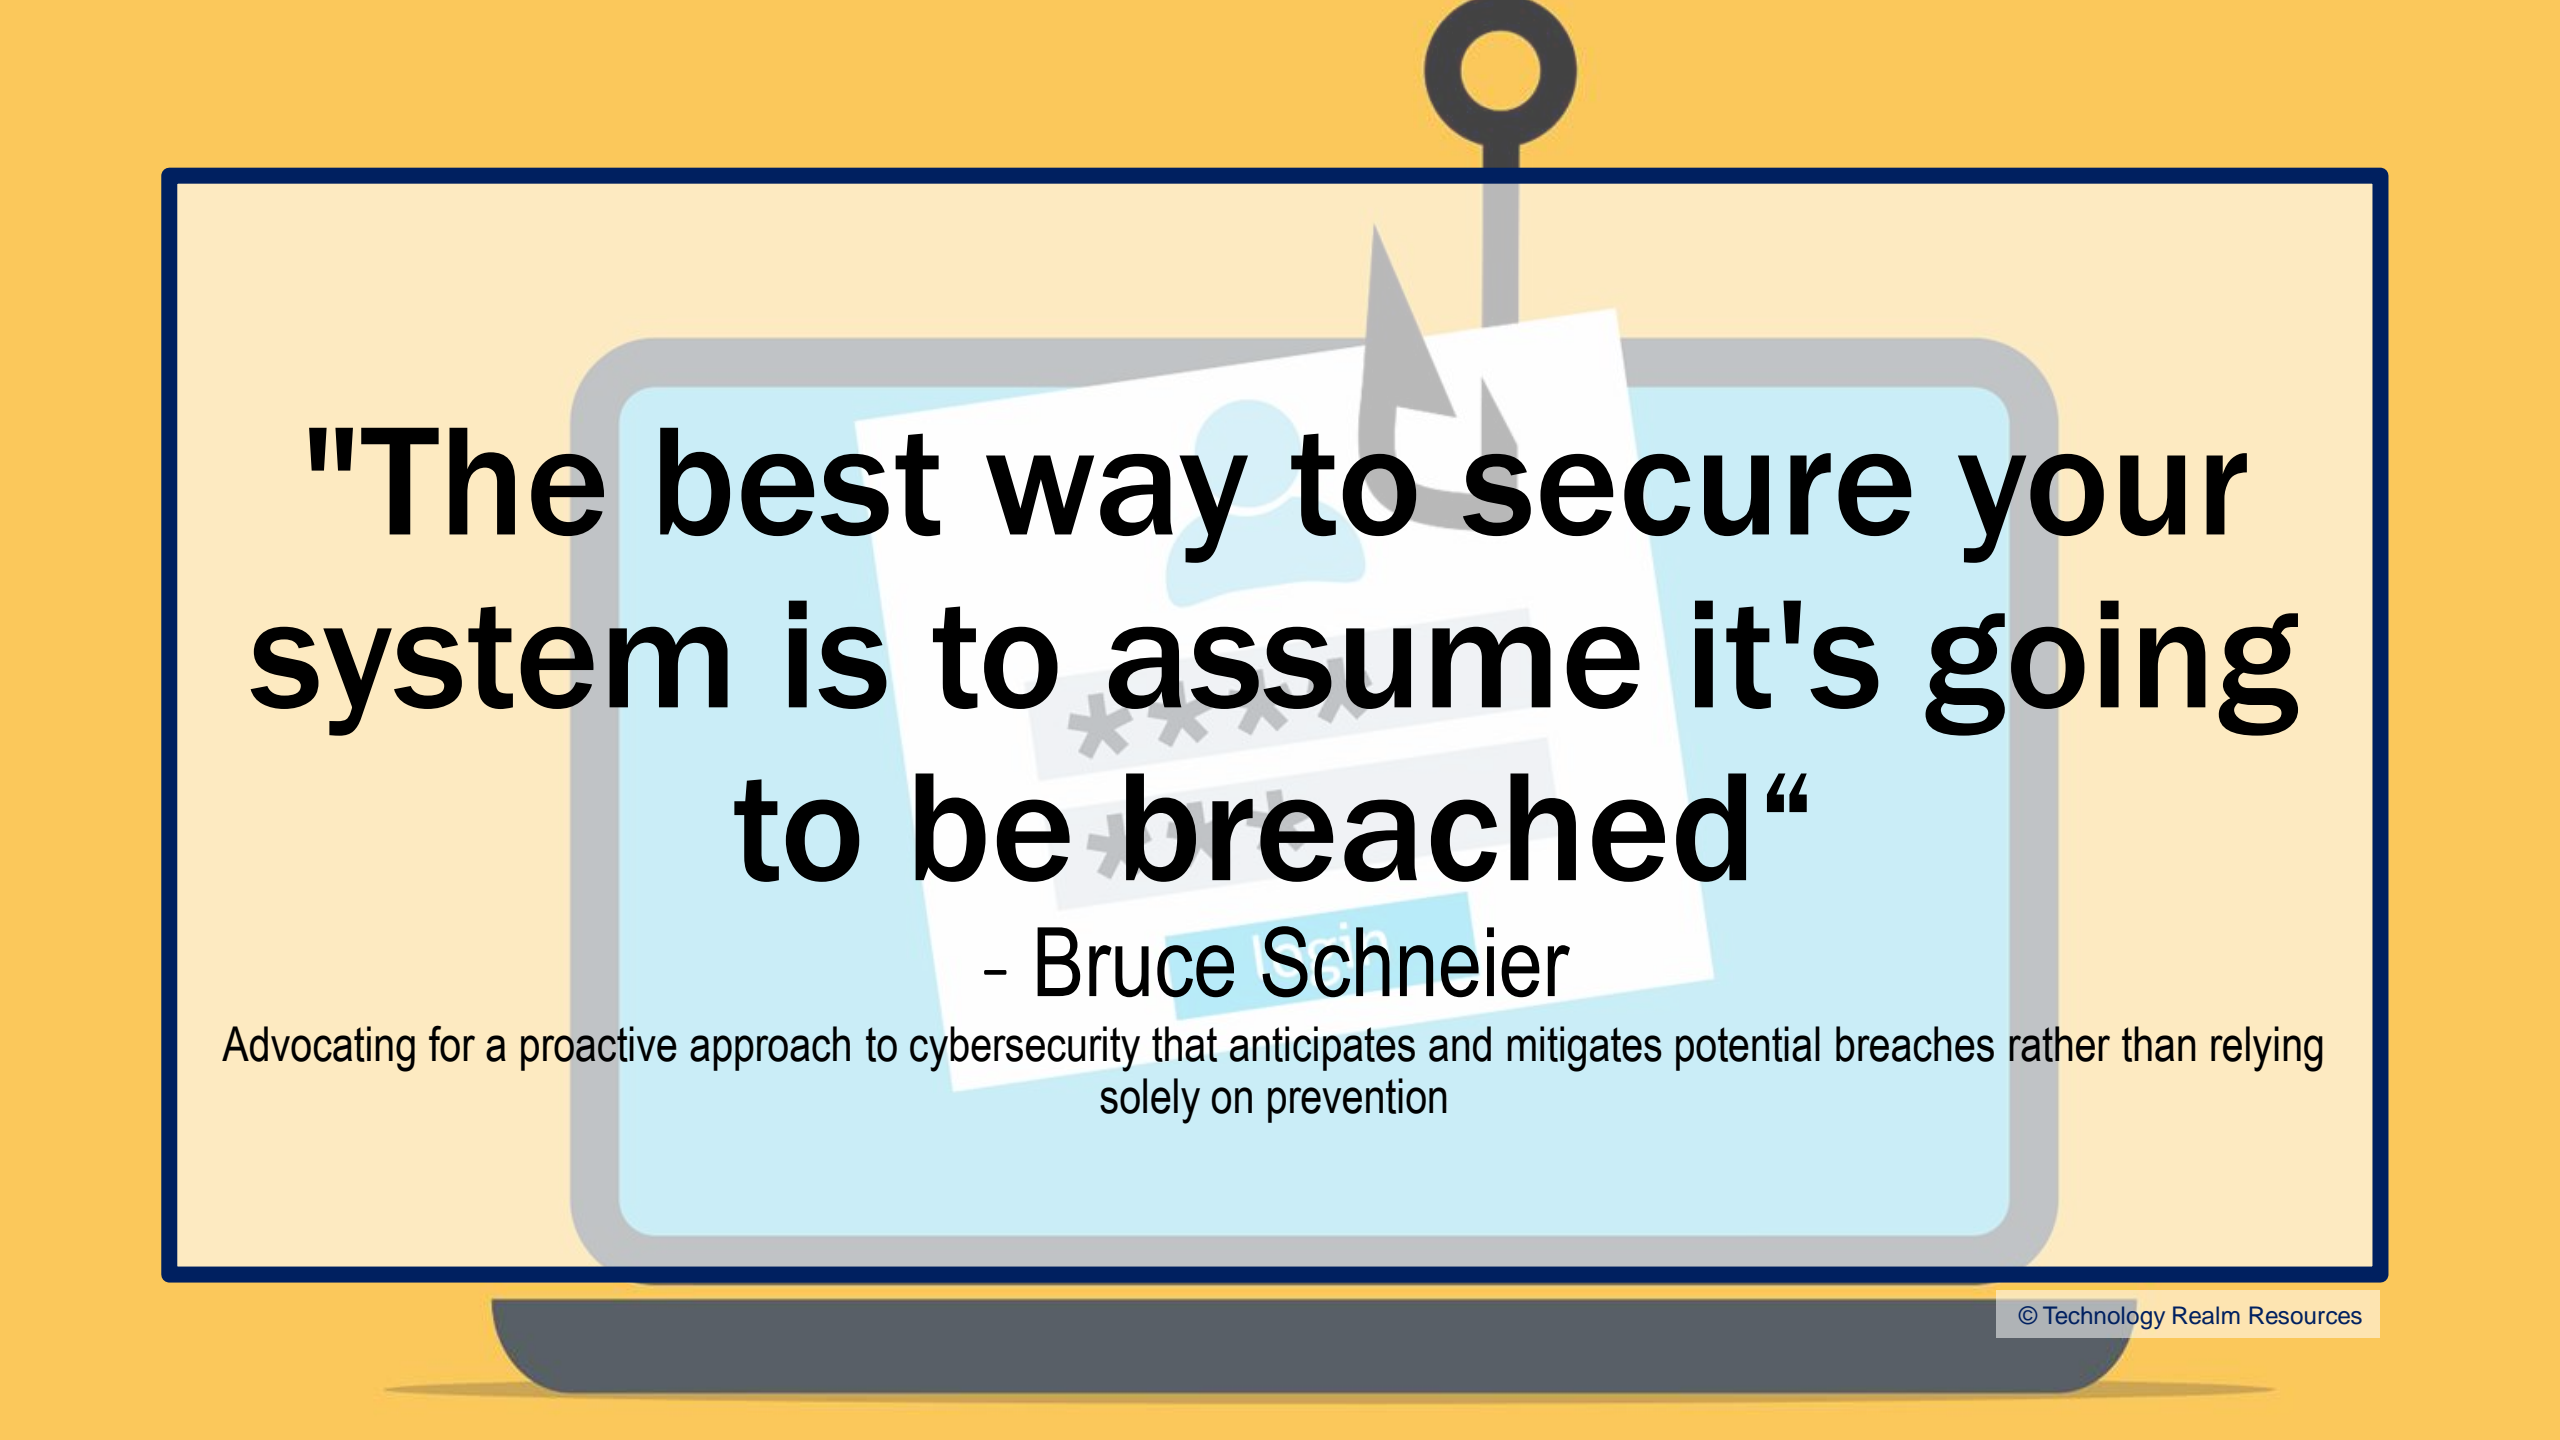

Known for his insights into the evolving landscape of cybersecurity threats and motivations, "The most famous hacker in the world"

**"Every time you type a
password into a computer,
you're relying on the security of
someone else's code"**

- Avi Rubin

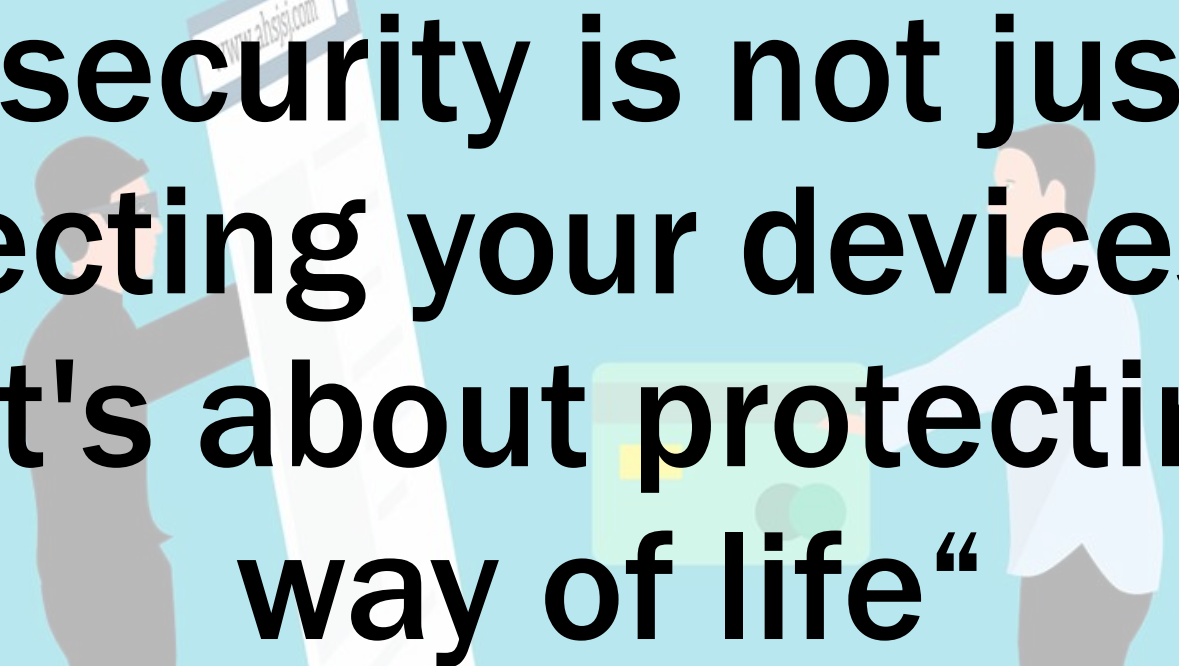

A computer scientist and cybersecurity expert, reminding users of the inherent trust placed in software systems and the importance of rigorous security testing

"The best way to secure your system is to assume it's going to be breached"

- Bruce Schneier

Advocating for a proactive approach to cybersecurity that anticipates and mitigates potential breaches rather than relying solely on prevention

"Cybersecurity is not just about protecting your devices and data, it's about protecting your way of life"

- Barack Obama

Former President of the United States, highlighting the broader implications of cybersecurity for individuals, societies, and economies

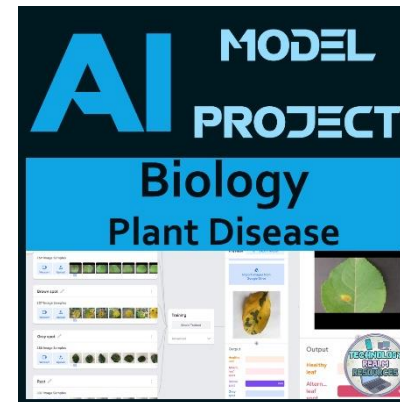

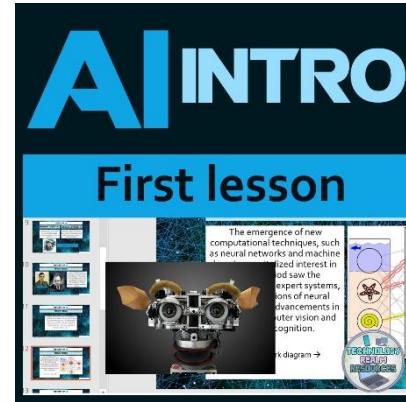

"The most dangerous phrase in the language of cybersecurity is 'we've always done it this way'"

- Grace Hopper

A pioneering computer scientist and naval officer, emphasizing the importance of adaptability and innovation in cybersecurity strategies
